The Signal Mine.

Suit has been filed in the Fifteenth District Court at San Francisco by Alonzo E. Davis to prevent the Signal Mining Company from collecting an assessment levied on the 16th of May last, on 6,436 shares owned by him. The complaint sets forth that Davis and Jackson McCrackin were the owners of the McCrackin et al, Owen District, Washoe County, Arizona consisting of 1,500 feet. On the 18th of December, 1876, they made an arrangement with Wm. N. Leete to put a 10-stamp mill, to work the mine and incorporate a company, they to retain two-fifths of the capital stock, which should be exempt from assessment. Leete went into possession, took Thomas Ewing into the mine, and on the 28th of March, 1878, the two incorporated the Signal Company delivered Davis and McCrackin 6,434 shares of the Company stock each. Plaintiff claims that the assessment on all the stock is in violation of his contract with Leete, and that the only title the Company has to the mine is derived from Leete, and is therefore subject to the original contract. Judge Dwinelle granted a restraining order in accordance with the prayer of the complaint, and an order to show cause.

The Sauto Tunnel.

The following is contained in a dispatch from Virginia City, Nevada, under date of July 8th, at 11 p. m.: At 9 o'clock this evening, a drill-hole connected the 1650-foot of the Savage with the Sauto Tunnel, and at a quarter to 11 o'clock eight giant powder cartridges were put in and exploded. The blast blew out a hole seven feet across, and instantly a rush of smoke and hot air whirled through the drift, blowing out the lanterns of the miners and filling the drift with dust and gravel. The Superintendents of the Savage and the bonanza mines, reporters of the press and others were present. A ladder was put down and Sauto came up. There were congratulations and handshaking all round. The miners above ground hoisted the American flag, and beer was drunk in tremendous quantities. The air was growing hotter and hotter as they left the drift, the mercury standing at about 110 degrees. The draft is very strong and is increasing. The surveys were correct. Water, to the amount of 1,285,100 gallons per day, flows from the mouth of the tunnel.

A man is more than 5,000 times larger than a cockroach, yet can run only eight times faster.

GENERAL MERCHANDISE.

Now that the Mineral Resources of Arizona are being rapidly developed, agricultural products will be in great demand and the Farmer will quickly find himself King, and while enjoying home comforts will reap largely of the golden harvest of the hardy miner. Prospectors who are searching the mountains for hidden treasures—it may be poor as Job's turkey—will in a moment find themselves Bonanza Kings and be able to revel in luxury the rest of their days; but all men cannot become owners of rich mines! All men cannot become wealthy farmers! To the great mass of mankind the price of pork and beans will still be an object.
